Featuring over 80 different wines, champagnes, and brandies, Brookside Winery's main facility is in the largest granite stone building in California. These cellars were built in 1904 and are 600 feet long, 100 feet wide, with walls 3 feet thick and 23 feet high. Within is the largest underground stone cellar in the state. Brookside is one of California's oldest wineries — originally established in 1832.
